

DFK 61

Pipe cleaning nozzle

Rotation under maximum pressure.

The pipe cleaning nozzle DFK 61 offers maximum capability and effectivity for cleaning extremely soiled and clogged pipes. Due to its leakage-free operation, it is able to deliver maximum performance. A rotational speed, which can be adjusted externally, makes operation a lot more easier. Long service life guarantee reliable deployment.

Advantages at a glance

- Maximum performance due to leakage-free sealing
- Operation possible with/without guide slides
- Versatile combinations with a wide nozzle head portfolio
- Long service life
- Adjustable rotational speed
- Low weight: 2.0 kg
- Low-cost deployment and maintenance
- Fast exchange of wear parts

Technical data	DFK 61
Operating pressure	1,600 - 3,000 bar
Recommended flow rate	10 - 40 l/min
Adjustable rotation speed	500 - 2,000 min ⁻¹
Diameter	61/75/101 mm
Weight without slides	2.0 kg
Weight with slides, without skids	3.2 kg
Weight with slides and skids	4.5 kg
1 bar = 14.5038 psi, 1l = 0.26417 Gal., 1 kW = 1.3410 HP, 1mm = 0.03937 inch
