

HP20-5

Pressure test pump

Hand-operated up to 3000 bar.

The pressure test pump HP20-5 completes the hand-operated test pump series at top pressure range up to 3000 bar. The 2-stage pressure test pump offers a wide range of applications.

The HP20-5 is used for hydrostatic pressure testing of pipelines, tanks, cylinders and

installations acc. to pressure equipment directive 97/23/EG.

Equally for all pressurized high pressure cleaning components acc. to EN 1829-1.

Flexible and ergonomic handling are outstanding features of these compact and reliable pressure test pump.

Technical data	HP20-5
Test pressure	3000 bar
Flow rate / Stroke	11 cm ³ / 0.5 cm ³
Plunger-Ø	22 mm / 4.5 mm
Weight with chamber	approx. 90 kg
1 bar = 14.5038 psi, 1l = 0.26417 Gal., 1 kW = 1.3410 HP, 1mm = 0.03937 inch
